

When you turn on the game, you see the menu.

You can now push **GAME OVER**, but I would not recommend you it.

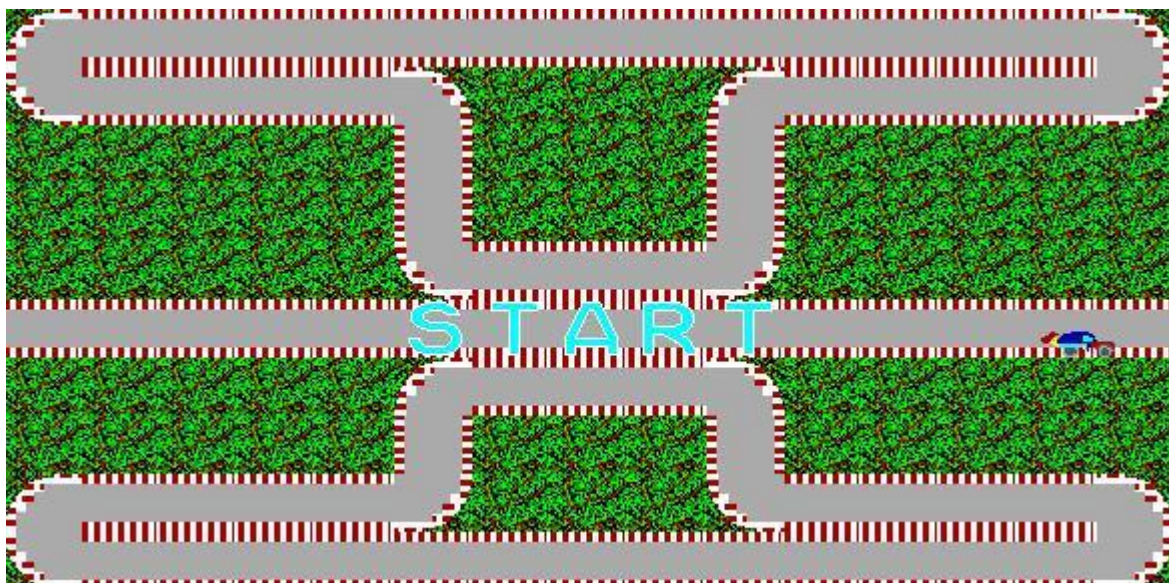

But I would recommend push **Instruction**, Here is all important explanation.

Or you read this manual.

You'll notice that in the right corner of the possibility of choosing a car. So click on it you like most.

You can choose from three tracks, NASCAR, Singapore, Monza.

When clicking on them starts the countdown: 1,2,3, in the middle of the screen begins to ride a car.

Now for the individual tracks.

All the **Nascar** fans will know what to click, but it's classic and a little boring oval.

Very interesting track is **Singapore**, Each year there are ride (among other races)

Formula 1, the first time in 2008. Now you can ride there too.

And last, you can try **Monza** track, it really exists and is located in Italy,

This track is already a great classic motoring, the Formula 1 races run here since 1950!

Very important to you in each round, **go to BOX in every race**, or do you not show your time.

Good luck 😊.
